Jenni Diaz
14.3 Exercise

1. ES5 Map Callback:

```
function double(arr)
{
  return arr.map(function(val)

{return val * 2; });
}
```

2. ES2015 Arrow Functions Shorthand:

```
const double = arr => arr.map(val => val * 2);
```

3. Replacing ALL the functions with arrow functions:

```
function squareAndFindEvens(numbers)
{
var squares = numbers.map(function(num)

{return num ** 2;});

var evens = squares.filter(function(square)

{return square % 2 === 0;});

  return evens;
}
```

```
const squareAndFindEvens = numbers => numbers.map(val => val ** 2).filter(square => square
% 2 === 0)
```
